HONEYBEES

WHAT THEY NEED
TO LIVE

nectar
pollen
hive
honey

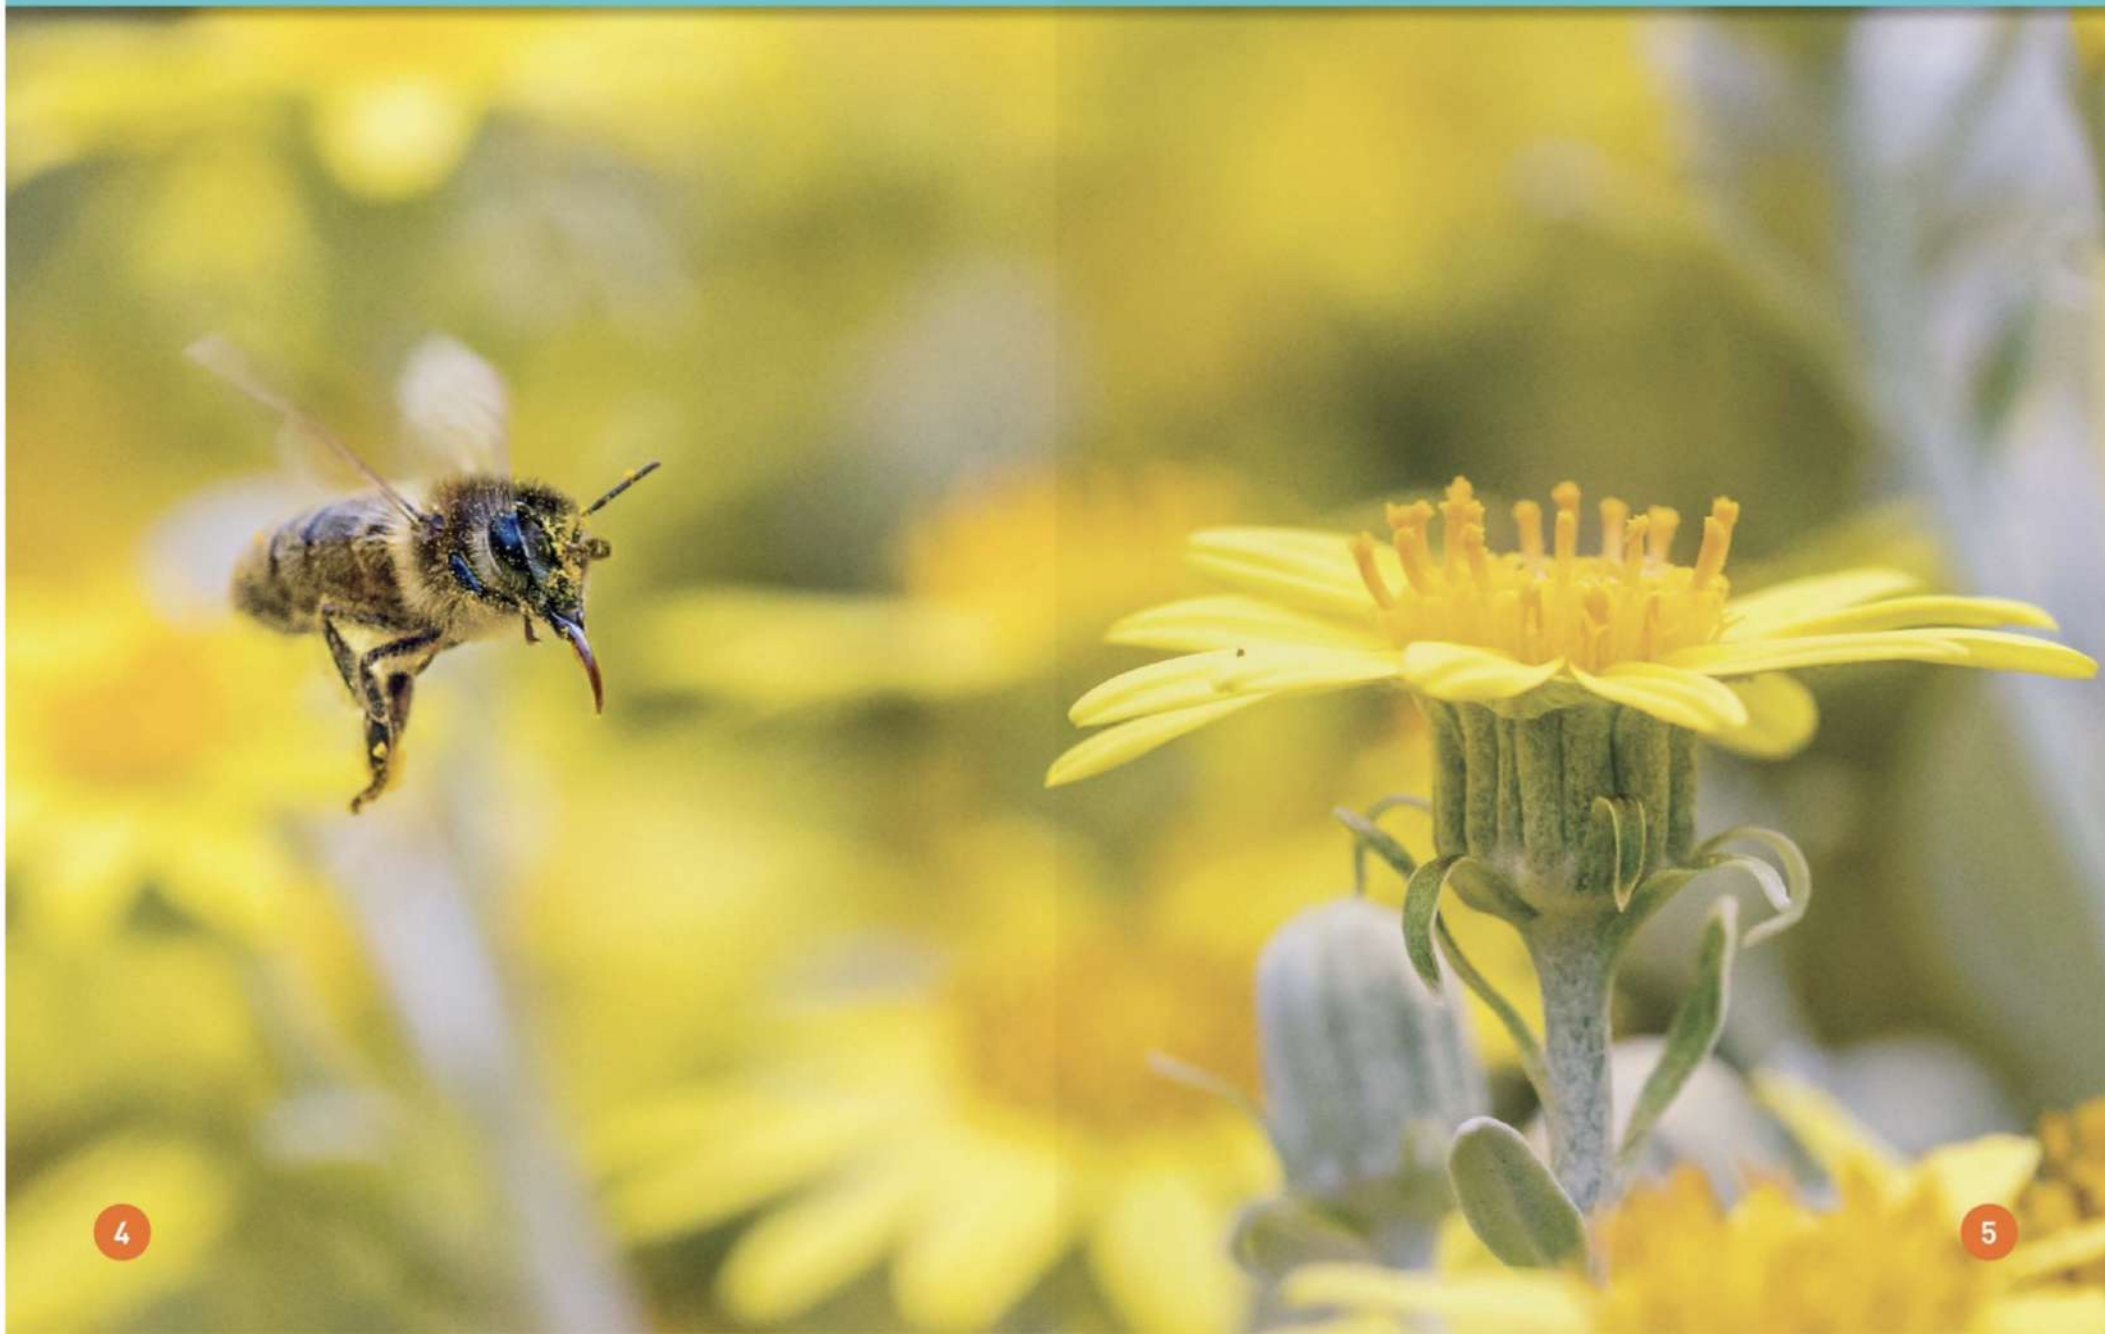

WHAT THEY DO

buzz
fly
eat
drink
dance

A bee flies in the air.

It looks for a flower.

There's a sweet treat in flowers.
It's called nectar.

6

The bee drinks.

7

The bee eats.
It eats pollen.

Bees carry
pollen in a basket
on their legs.

It gets pollen to take home.

A bee's home is called a hive.

Many bees live in the hive.

Bees put pollen in the hive.

12

Once nectar becomes honey, bees put it in a honeycomb.

They make honey from nectar, too.

13

In the hive, a bee dances.

The dance tells other bees
where to find nectar.

18

The bees fly out of the hive.

They look for the nectar.

19

They use the dance to find
the right flower!

Buzz, bee!

NECTAR AND POLLEN:

What are they like?

Nectar drips.
It's sweet.

Pollen is made up
of tiny balls.
It's like powder.

YOUR TURN!

Think of a spot in the room. Do a "waggle" dance to tell your friend how to get there! Then switch roles.
